

M4300N Gang Resaw

Power through notched cants.

Designed for the pallet industry, the Pendu 4300N Gang Saw is designed to install in-line between the stringer notcher and the stacker. With cantilevered arbors designed to handle 8", 10", or 12" saw blades, the Pendu M4300N Gang Resaw has the capability to handle material up to 8" high and 12" wide. And with two 100HP motors, it's got the capacity to power through your most demanding requirements. Built on a thick, 3/4" steel box-frame, each unit features an automatic chain infeed system and one-touch hydraulic height adjustment. Easy-access arbors, supported with conical outboard bearings, make maintenance simple — changeover a breeze.

Specifications

Cutting Capacity	8" x 12" / 24" Min. Length
Arbor Diameter	2 3/8"
Max. Saw Blades/Arbor	16
Number of Arbors	Two 100 HP ODP
Variable Feed Rate	Up to 90 FPM
Automatic Chain Infeed	Standard
Motor	30 HP ODP Electric Motor
Inboard Cant Sizer	Standard
Powered Feed Rolls	21, Hydraulic Height Adjustment Standard
