

MODEL 3800 STAKE POINTER

HIGH PERFORMANCE, MAINTENANCE FREE

With a capacity of producing 2,700 stakes per hour, it's easy to see why we call the redesigned 3800 the High Speed Stake Pointer. Now even faster and safer to operate, the 3800 stake pointer is able to handle squares or rectangles from 3/4" up to 2" thickness in 20" to 72" lengths. The 3800 features a powerful 10 HP TEFC 3600 RPM cutter head motor and rugged 3 HP variable speed feed motor. Virtually maintenance free, the redesigned 3800 stake pointer has additional guards on a heavy duty steel frame and comes complete with electric power and a pre-wired operator control station.

3800 High Speed Stake Pointer Specifications

Pointing Rate	Up to 2700 stakes per hour
Stake Size	3/4" to 2" square or rectangle
