

MODEL M4300N GANG SAW

Power Through Notched Cants

The Model 4300N gang saw was designed for the pallet industry to be installed inline between the stringer notcher and the board stacker. With it's 21 powered feed rolls, 13 on the top and 8 on the bottom you can power through notches with ease. Built on a thick 1" steel box frame, each machine features one touch hydraulic height adjustment for the top rolls and cant-sizer, automatic chain infeed system and easy-access arbors supported with conical outboard bearings making maintenance simple and change-overs a breeze.

M4300N GANG RESAW

Cutting Capacity	8" X 12" / 24" Minimum Length
Arbor Diameter	2-2/3"
Max. Saw Blades per Arbor	16
Number of Arbors	Two 100 HP TEFC
Variable Feed Rate	Up to 90 FPM
Automatic Chain Infeed	Standard
Motor	30 HP TEFC Electric Motor
Inboard Cant Sizer	Standard
Hydraulic Height Adjust.	Standard
