

Model 1400 Drill Station

Efficient Specialized Drilling.

Designed and manufactured primarily for the log home industry, Pendu Model 1400 Drill Stations are manufactured as a single drill head or as multiple heads in-line. Each unit comes complete with powered rollcase, featuring 14" wide machined rolls, hydraulic clamps, and a bottom waste removal auger. Units can be custom configured for vertical and/or horizontal drilling. For increased productivity, optional equipment includes computerized stops, drill guides and counter bore drills.
