

Model 1800 Slab Recovery

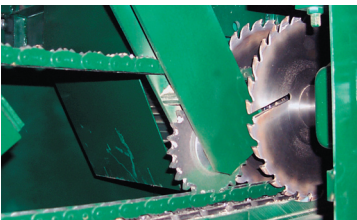

Increase The Efficiency of Your Slab Recovery.

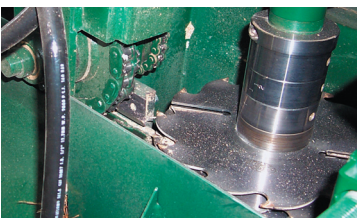

The Pendu 1800 Slab Recovery unit allows you to reclaim 4" or 6" boards from the slabs created from your scragg mill. Each machine features two edger blades at the infeed and one or two vertically mounted arbors with two or three sawblades at the outfeed. Individual models are available to handle slabs up to 16' long by 20" wide by 6" thick. Standard equipment includes an operator console control and a variable speed feed system.

Specifications

Slab Capacity	6' L x 14" W x 6" Thick / Cuts up to 4" W Boards
Vertical Edger	Two 16" Diam. Blades / Two 15 HP Motors
Horizontal Arbor	Three Sawblades / One 40 HP Motor
Variable Speed Rate	Up to 120 FPM
Control Panel	Std.
Hydraulic Feed System	Fully Adjustable
Sawdust Control	Belting and Panning

Each Model 1800 features two vertical edger blades at the infeed.

Finished boards are manufactured by the horizontal blades, positioned at the outfeed.
