

Model 3200S Cant Sizer

Size cants easily and efficiently.

With two hydraulically driven hold down rolls and a 12" wide planer head with a carbide insert, the Model 3200S Cant Sizer delivers the power you need to easily size cants prior to remanufacturing. Capable of removing up to 1" of material from the side of the cant at speeds up to 90 FPM, the Model 3200 can be installed as a stand alone unit or inline with your present system.
