

M9700 Gang Resaw

Power when you need it.

Designed for the log home manufacturing industry or companies who remanufacture large timber, the Pendu M9700 Gang Saw is our top-of-the-line model. With cantilevered arbors designed to handle up to 19" dia. saw blades, the Pendu M9700 Gang Resaw has the capability to handle material up to 14" high and 14" wide. And with two 125HP motors, it's got the capacity to power through your most demanding requirements. Built on a thick, full 1" steel box-frame, each unit features an automatic chain infeed system, one-touch hydraulic height adjustment and inboard cant sizer. Easy-access arbors, supported with conical outboard bearings, make maintenance simple — changeover a breeze.

Specifications
