

PENDU 1000 SERIES EDGER

The Pendu 1000 Series Edger is available in almost any custom configuration and almost any options you want to handle the widest variety of material sizes. Built to handle material thicknesses up to 10.5", the 1000 Series machines are available with a single bay set-up or combo split bay set-up. All are designed with single panel access - simply lift the top cover to access saws or the side panel to access the 4" diameter arbors. Pendu Edgers are the most flexible, efficient edgers on the market today.
